Macro Update:

Private credit growth drops

Private sector credit growth dropped 1.12% in June from a year earlier due to cautious lending and slow export and remittance growth. In June, private sector credit grew 15.66%, which is less than the target of 16.5% set in the monetary policy for the second half of fiscal 2016-17. One of the reasons for the slow growth could be the banks' cautious attitude towards sanctioning loans.

Issuing bank's highest lending rate plus 5.0%

The interest rate on the outstanding amount of credit card shall not exceed 5.0% of the highest interest rate offered in any credits of the respective banks, according to a revised guideline. Interest/profit shall be charged on the unpaid amount due for payment, said a notification on the guidelines issued by Bangladesh Bank (BB) Thursday. The new guidelines on credit card operations will come into effect from January 01 next.

Interest rates on lending fall again in June

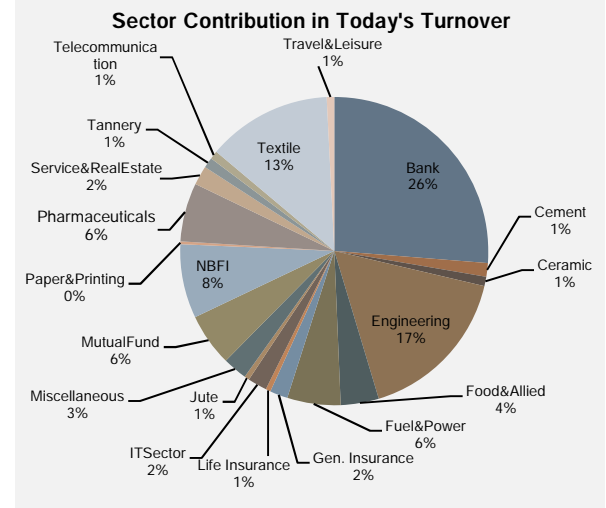

Interest rates on lending decreased again in June after an increase in May as commercial banks were forced to cut the rates in June against the backdrop of businesses' persistent reluctance to borrow from banks due to a sluggish business situation in the country. Interest rates on lending had increased in May after a 29-month fall. The weighted average interest on lending decreased to 9.56% in June from 9.66% in May this year.
